jQuery and Javascript	
Full page js	
Github / CI-CD	
GO Lang	
Payment gateway plugins	
MySQL	
HTML/CSS	
MVC Architecture	
Codeigniter	
Wordpress Plugin Customization	

ABOUT ME

As a Sr. Software Engineer at E2M solutions, I develop and deliver high-quality, scalable, and user-friendly applications using PHP, Laravel, and Wordpress. E2M is a leading IT company that provides web and mobile solutions to clients across various industries, such as e-commerce, education, and healthcare.

I have over 10.5+years of experience in this role, and I have contributed to multiple projects that enhanced the functionality, performance, and security of the applications. For example, I worked with a team of developers to create a custom e-commerce platform for a large client, integrating features such as payment gateway, inventory management, and analytics. I also implemented a responsive design, ensuring compatibility with different devices and browsers.

I hold a Bachelor of computer application from Maharaja Sayajirao University of Baroda, Vadodara, where I learned the fundamentals of computer software engineering and gained hands-on experience in various programming languages and frameworks. I am passionate about learning new technologies and improving my skills, as I believe in continuous growth and development. My goal is to advance my career as a professional in the field of computer engineering and to work in an environment that challenges me and enables me to use my full potential.

WORK EXPERIENCE

Total - 10.5 years

SENIOR FULL-STACK DEVELOPER

2024 - Current

E2M SOLUTION

- Developed scalable web applications and custom WordPress solutions using Laravel, CodeIgniter, and modern web technologies for client-specific business requirements.
- Built custom WooCommerce solutions, payment gateway integrations, and REST APIs for seamless third-party service integration and business automation. Developed ecommerce solutions with custom payment gateway integrations and secure transaction handling.
- Contributed to the WordPress ecosystem through performance-related improvements, optimization workflows, and modern development practices.
- Developed automation tools for converting Figma designs into WordPress builders and dynamic ACF-based structures to streamline development workflows.
- Worked with React and TypeScript to build reusable and user-friendly frontend components for modern web applications.
- Improved application performance through database optimization, caching mechanisms, and backend performance enhancements.
- Used Node.js and Python scripts for automation tasks, API monitoring, background processing, and workflow improvements.
- Strong experience in WordPress customization, plugin development, debugging, troubleshooting, and scalable ecommerce platform development.
- Currently learning and exploring Go language for backend development.

SR. FULL-STACK DEVELOPER

2019 - 2024

ELSNER TECHNOLOGY PVT LTD

years - 4 years and 8 month

- Developed custom WordPress themes and plugins tailored to diverse client needs, with a strong focus on scalability and performance.
- Enhanced WooCommerce stores by building dynamic features like AJAX filtering, real-time inventory updates, and multi-currency checkout systems.
- Integrated REST APIs to connect with third-party tools, enabling seamless CRM and ERP integrations.
- Improved website performance through caching, database query optimization, and debugging poorly coded plugins and themes.
- Gained hands-on experience with Node.js, creating server-side scripts for managing webhook events and dynamic content updates.

WEB DEVELOPER

2016 - 2019

WEBINDIA INC.

years - 2 years and 6 month

- Designed and developed responsive websites using WordPress, PHP, HTML, CSS, and JavaScript, adhering to industry standards.
- Debugged and maintained legacy WordPress themes and plugins, enhancing functionality and ensuring compatibility with new updates.
- Built interactive website features using JavaScript and jQuery, such as sliders, navigation menus, and modals.
- Assisted in large-scale migration projects, ensuring minimal downtime and zero data loss during transitions.
